

PROFESSIONAL SUMMARY

- Overall 3+ years of experience in the IT industry, with 2.4 years of software development experience focused on Java Full Stack development with Angular. Involved in the design and development of web applications using Java, Hibernate, Spring Boot, and RESTful services.
- Proficient in developing RESTful APIs (Web services) using Spring Boot, with strong hands-on experience in frameworks like Spring Framework and Hibernate.
- Experienced in working with front-end technologies such as Angular, HTML, CSS, Bootstrap and Angular Material, integrated with back-end services through RESTful APIs.
- Hands-on experience with RESTful services, and project management tools like JIRA, along with working knowledge of CI/CD pipelines for continuous integration and delivery.
- A collaborative team player with a proven ability to meet deadlines and deliver high-quality solutions in fast-paced environments.
- Excellent verbal and written communication skills and the ability to communicate effectively with both non-technical business users and technical IT developers.
- Detail oriented, quick learner, good listener with strong problem-solving skills.

WORK EXPERIENCE:

- Working as a Software Engineer in **Capgemini** from May 2022 to till date.
- Worked as a Transportation Representative at **Amazon** from August 2021 to May 2022.

QUALIFICATION:

- **Bachelor of Technology** (Information Technology) from Jawaharlal Nehru Technological University Hyderabad in 2020.

TECHNICAL SKILLS:

| | |
|--------------------|---|
| Primary Skills | Java, Spring Boot, Restful Webservice, Angular |
| Web Technologies | HTML5, CSS, JavaScript, TypeScript, Angular, Bootstrap, Angular Material. |
| Frameworks | Spring, Spring Boot, Hibernate, JDBC, Microservices, Junit, Angular. |
| Database | Postgres, MYSQL |
| Tools | Eclipse, Git, JIRA, Visual Studio |
| Repository | GIT |
| Application Server | Apache Tomcat |

PROJECT DETAILS:

PROJECT # 2

| | |
|--------------|---|
| Client Name | Morgan Stanley |
| Company Name | Capgemini |
| Project Name | Development |
| Duration | March 2023 to till date. |
| Environment | Java, Spring boot, Restful, JPA, Hibernate, Git, Maven, Postgres, Angular |
| Location | Pune |
| Payroll | Capgemini |

Roles and responsibilities:

- Developed RESTful APIs using Java Spring Boot and JPA for product management, client management, distribution management, and product history retrieval.
- Implemented and maintained frontend components using Angular, ensuring integration with backend services for dynamic data handling.
- Worked with Jira for project tracking, issue management, and sprint planning.
- Contributed to CI/CD pipelines to automate build, test, and deployment processes for continuous integration and delivery.
- Enhanced system performance and maintainability through efficient API design and frontend development.

PROJECT # 1

| | |
|--------------|---|
| Client Name | SCB |
| Company Name | CAPGEMINI |
| Project Name | Development |
| Duration | August 2022 to February 2023 |
| Environment | Java, Spring boot, Restful, JPA, Hibernate, Git, Maven, Postgres, Angular |
| Location | Hyderabad |
| Payroll | CAPGEMINI |

Roles and responsibilities:

- Designed and implemented RESTful APIs using Java Spring Boot and JPA to manage home loan applications, including creation, processing, approval workflows, and document management.
- Developed secure and efficient endpoints for retrieving application details, processing loan approvals, and managing customer data.
- Utilized Angular to build dynamic, responsive user interfaces for the home loan application system, including components for loan submission, status tracking, and document management.
- Implemented client-side validation and interactive features to enhance user experience and streamline the application process.
- Managed project tasks, tracked issues, and planned sprints using Jira, collaborating with cross-functional teams including UX/UI designers and backend developers to ensure seamless integration.
- Contributed to CI/CD pipelines by automating build, test, and deployment processes, ensuring continuous integration and reliable delivery of updates.
- Conducted performance tuning and optimization for both frontend and backend components to enhance system responsiveness and scalability.
- Prepared detailed documentation for API specifications, frontend components, and system architecture, and participated in knowledge sharing sessions to align team efforts and improve project outcomes.
